(A) शिक्षाशास्त्रावगमः। (Pedagogical understanding)

**30 Questions**

(i) भाषाधर्माः नैपुण्यश्च। भाषाधर्माः - आशयावगमः, आशयप्रकाशः, आस्वादनम्। श्रवणभाषणवाचनलेखननैपुण्यः।

(ii) भाषाबोधनसमुपगमः (Approach of learning language)

प्राचीनरीतयः - गुरुकुलसम्प्रदायः, भण्डार्कर् सम्प्रदायः, पाठपुस्तक सम्प्रदायः।

नूतनरीतयः - ज्ञाननिर्मितिसम्प्रदायः, समस्याधिष्ठितसम्प्रदायः, विमर्शनात्मकबोधनसम्प्रदायप्रभृतयः।

(iii) भाषाव्यवहाररूपाणां विभिन्नबोधनरीतयः - गद्यपद्यचम्पू इत्यादयः।

(iv) भाषाध्यापनसमस्याः। (Challenges of teaching language in diverse classrooms - language difficulties, errors and disorders)

(v) आसूत्रणस्य वैविध्यम्। (Different types of planning)

(vi) पाठ्यचर्या पाठ्यक्रमश्च। (Curriculum and Syllabus)

(vii) मूल्यनिर्णयभेदाः - साम्प्रदायिकः नूतनाश्च। निरन्तरमूल्यनिर्णयः, परस्परमूल्यनिर्णयः। स्वयंमूल्यनिर्णयः। श्रेणीकरणञ्च।

(viii) पठनोपकरणानि - पाठपुस्तकम्, नूतनसाङ्केतिकसामग्रयः, बहुभाषायुक्तकक्ष्या। (Teaching learning materials - textbook, multi-media materials, multi lingual resources of the classroom)

(ix) परिहारबोधनम्। (Remedial teaching)

(B) विषयः (Content) - आशयाः धारणाश्च (Concepts and Ideas)

**50 Questions**

(i) भिन्नशास्त्रेभ्यः संकलिताः मौलिकाशयाः (Basic ideas and concepts from different sastras- Nyaya, Jyotisha, Vyakarana, Vedanta and Sahitya)

(न्यायः - ज्योतिषः - 3 + 2 Q, व्याकरणः - 5 Q, वेदान्तः - 5Q, साहित्यः - 5Q)

**20 Questions**

(ii) भाषाव्याकरणम् - सन्धिः, समासः, कारकाणि, कृत्तद्धिताः, प्रयोगाः, धातवः, लकाराः।

**10 Questions**

(iii) वृत्तालङ्कारौ 2 + 3 Q

**5 Questions**

(iv) आनुकालिकविषयाधिष्ठितम्। (Current sanskrit literature)

**3 Questions**

(v) संस्कृतसाहित्येतिहासः। (History of sanskrit language and literature - specially contribution of Kerala to sanskrit literature)

**12 Questions**

Ref: SCERT द्वारा निर्दिष्टानां नवमी, दशमी, +1, +2 कक्ष्याणां (अक्कादमिकसंस्कृतविद्यालयानां) पाठपुस्तकानि च।

**I. PHYSICAL SCIENCE****80 Questions****A. PHYSICS**

(25 questions)

**1. Wave motion :**

Transverse and longitudinal waves, propagation of wave, medium dependence. Sound - loudness, frequency, wavelength, pitch, reflection and refraction of sound waves, echo, beats, Doppler effect, reverberation, SONAR, sound pollution, resonance and musical instruments.

**2. Light :**

Reflection - plane mirror, spherical mirror, multiple reflection, image formation by spherical mirrors and its applications. Refraction : Optical density, total internal reflection and applications. Ray diagram and image formation by lens, lens equation, microscopes, telescope, camera, human eye and common defects of eye and its remedy. Dispersion of light, scattering of light, rainbow, Newton's Disc, colour of sky, cloud, snow. Primary colours, secondary colours - complementary colours.

**3. Force and pressure :**

Thrust, atmospheric pressure, Pascal's law, Archimedes principle, surface tension and capillarity.

**4. Heat :**

Temperature and temperature scales, modes of heat transmission, boiling, melting, Specific heat capacity, latent heat, regulation

**5. Motion :**

Displacement, velocity, acceleration, equations of motion, graphs of s-t, v-t and their relevance. Circular motion, centripetal acceleration, angular speed, momentum, Newton's law of motion, law of conservation of momentum. Recoil of gun, action - reaction pairs. Centre of gravity, banking of curve.

**6. Gravitation :**

Mass and weight, universal law of gravitation, acceleration due to gravity and factors affecting it, Solar system, orbits, planets, satellite, escape velocity, space exploration and weightlessness in space. Galaxies, stars, big bang, clusters, nebula, Super Nova, solar and lunar eclipse.

**7. Work and Energy :**

Conventional and Non-conventional sources of energy, forms of energy - heat, light, sound, mechanical, nuclear energy, mass energy. Law of conservation of energy.

**8. Electricity and Magnetism**

Natural and artificial magnets, different types of magnets and their properties, magnetic field lines or lines of force. Earth and its magnetism. Magnetic induction, magnetic properties of matter - para, dia and ferro magnetic materials. Static electric properties, electroscopes, electro static induction, methods of charging, lightning and lightning conductors, earthing, current electricity, electric potential, Ohm's law, resistance, conductance, resistivity, conductivity, factors affecting resistance. Resistance in series, parallel, use of voltmeter, galvanometer, ammeter, rheostat, Joule's law of heating.

**9. Effects of current and Electromagnetic Induction**

Electrolysis, voltameter, Faraday's law of electrolysis, chemical cells, solenoids, electromagnets, electromagnetic induction, AC, DC Generators, electric motors, transmission of AC, self induction, mutual induction, transformers, moving coil microphones, loud speaker.

**10. Electronics**

Conductors, insulators, semi conductors, doping, different types of diodes and applications, transistor and its applications, ICs.

**B. CHEMISTRY**

(25 questions)

**1. Physical changes and Chemical changes :**

Exothermic and endothermic reactions, electrolysis of water, energy changes in chemical reactions, electroplating

**2. Atoms and Molecules**

Basic concepts, structure of atom, sub atomic particles - electrons, protons and neutrons, Rutherford's gold foil experiment, Atom models, Rutherford's atom model, Bohr model of atom, electron shell model, stability and electronic configuration

**3. Metals**

Properties - metallic luster, malleability, ductility, conducting property, sonority, corrosion - factors responsible for corrosion, prevention of corrosion, reactions of metals with water, air and acids, Displacement reactions of metals, reactivity series, iron - historical background, extraction using blast furnace, extraction of aluminium from bauxite

**4. Solutions**

Definition, components of a solution, water as universal solvent, suspensions, concentration of a solution, solubility, super saturated solution

**5. Colloids**

Definition, properties, artificial drinks, chemicals used in soft drinks

**6. Nature of matter**

Three states of matter and their characteristic properties, surface tension, cohesive force and adhesive force, capillarity, capillarity rise and capillarity dip, applications of surface tension and capillarity.

**7. Separation of Mixtures**

Classification of matter, mixtures and pure substances, homogeneous and heterogeneous mixtures, methods of separation of mixtures - filtration, sedimentation, decantation, centrifugation, distillation, fractional distillation, differential extraction using separating funnel, chromatography.

**8. Periodic table and chemical bonding**

Early attempts of classification of elements, Mendeleev's periodic table, periodic law, merits and demerits. *Modern periodic table* - Moseley's periodic law, nature of elements and electronic structure, valency, representative elements, transition elements, sub shell electronic configuration, classification of elements into blocks (s, p, d & f) and their characteristics.

*Periodic trends in properties of elements* - Atomic size, number of shells, number of valence electrons, electro negativity, ionisation energy, electro positivity, metallic and non-metallic character

**10. Chemical bonding**

Octet rule, ionic bond and covalent bond, valency and electro negativity, difference in the formation of compounds, comparison of the properties of ionic compounds and covalent compounds, representation of chemical reactions using chemical formula and chemical equation.

**11. Non-metals**

Non metals in food, water and air, reaction of non-metals with oxygen

- |                          |  |
|--------------------------|--|
| <i>Oxygen</i>            | - Allotropes of oxygen, methods of preparation, uses of oxygen, respiration, combustion and photo synthesis              |
| <i>Nitrogen</i>          | - Position in periodic table, inert nature of nitrogen, nitrogen fixation, nitrogenous fertilizers - merits and demerits |
| <i>Ammonia</i>           | - Laboratory preparation, manufacture of ammonia by Haber process, nitrogen cycle  |
| <i>Hydrogen</i>          | - Properties, methods of preparation, hydrogen as future fuel-merits and demerits  |
| <i>Chlorine</i>          | - Position in periodic table, properties, bleaching action   |
| <i>Hydrogen chloride</i> | - Laboratory preparation, properties, environmental problems of chlorine compounds                                       |
| <i>Carbon</i>            | - Unique nature, allotropes, important compounds, carbon cycle, green house effect, global warming                       |

**12. Organic compounds**

Classification, catenation, tetra covalency of carbon

**13. Acids and Alkalies**

Constituents of soil and plant growth, acidity of soil, properties of acids, pH, Properties of alkalies, neutralisation, properties of salts - their naming and importance, fertilizers - merits and demerits

**14. Gas Laws**

Boyle's law, Charles' law, Combined gas equation, Avogadro's law

**15. Chemical reactions and Mole concept**

Factors influencing rate of reaction - concentration, surface area, temperature and presence of catalyst.

*Mole Concept* - Atomic mass and molecular mass, Avogadro's law and mole concept, gram atom and gram molecule, mole concept and balanced chemical equations

**C. PEDAGOGY**

(30 questions)

- Science and its development in India - Science teaching as a process - product and contributions of eminent Indian scientists - developing scientific attitude.
- Aims and objectives of teaching Physical Science
  - Objectives of science teaching as envisaged in National Curriculum Framework (2005) - Values (practical, disciplinary, recreational etc) to be attained.
  - Taxonomy of educational objectives - Bloom, Yager - science process skills - developmental strategies.
- Theoretical basis of science teaching and learning.
  - Cognitive theories - Piaget, Bruner, Gagne - constructivist learning - Vygotsky, generating knowledge - experiential learning - scope and limitation - reflection - a basic process from learning experience - problem based learning.
- Planning science teaching and learning, unit plan, lesson plan - strengthening instruction by means of A-V aids, video lessons and computer assisted lessons.
- Models of teaching - characteristics - science process models, information processing models - concept attainment model, inquiry training model, constructivist model.
- Methods and strategies for teaching and learning Physical Science - direct and indirect, inductive, deductive, guided discovery, enquiry, investigatory and constructivist methods of instruction - scientific method.
- Approaches - integrated, interdisciplinary, environmental, problem solving and scientific process approach - behaviorist approach and constructivist approach.
- Science curriculum - modern trends in curriculum construction - concept of correlation - features of a science textbook. Workbook for pupils and handbook for teachers.
- Role of science laboratories, libraries, science clubs, science museums, fairs etc in promoting science learning.
- Tools and Techniques of evaluation in science learning - objective based - formative, summative, continuous and comprehensive evaluation, achievement tests - construction and administration - diagnostic testing, remedial teaching - objective type tests - advantages, new trends in evaluation grading, question bank.
- Professional development of teachers, strategies.

**J. NATURAL SCIENCE****80 Questions****1 Living world**

Characteristics of living things - Classification - Binomial nomenclature - Taxonomical aids

**2. Biological Classification**

History - Two kingdom classification - Five Kingdom Classification - Different Kingdoms- Characteristics, Examples -Lichens and Viruses

**3. Plant Kingdom**

Algae - Bryophytes - Pteridophytes - Gymnosperms - Angiosperms - Life Cycle-types

**4. Animal Kingdom**

Non chordates - Chordates

**5. Morphology of Angiosperms**

Root System- Structure, Function and Modifications with examples -Shoot system - Structure, function and modification with examples - Leaf - Arrangement, Modifications - Flower - Inflorescence - Fruits and seeds.

**6. Cell and Cell Division**

Cell - Structure and functions of different organelles - Mitosis, Meiosis and significance.

**7. Anatomy of plants**

Cell, tissues, types of tissues and function - Anatomy of stem, Root and leaf - 2° thickening in Dicot plants.

**8. Human Physiology**

Nutrition in human and other organism, eg: Hydra, Amoeba, Tapeworm - Human digestion and absorption - Human Respiratory system - Human Respiratory pathway CO<sub>2</sub> elimination, Respiration in other organisms, eg: Earthworm, Cockroach - Circulatory system - Open and closed system - Human heart - Human circulatory system - Human blood - Lymph - Human cardio vascular disorders - Excretory system and excretion - Excretion in lower organisms - Body structure and movement - Human skeletal system - Exo skeleton and endo skeleton - Joints - Locomotion in lower forms of organisms - Flight adaptation of birds - Aquatic adaptations of fishes - Human Nervous systems - Central and peripheral nervous system - Reflex action - Sense organs and functions - Nervous disorders - Nervous system of lower groups organisms - Reproductive system - Sexual and asexual reproduction - Human reproductive system - Gametogenesis - Fertilisation - Embryogenesis - Hormones in reproduction - Reproduction in lower group organisms - Infertility - Assisted reproductive techniques - Chemical Co-ordination - Hormones, Pheromones.

**9. Reproductive Health**

Population Explosion - Contraceptive - Assisted Reproductive techniques - Sexually transmitted diseases.

**10. Human Health and diseases**

Common diseases in humans - Transmission of diseases - Physical, mental and social health - Importance of balanced diet - Deficiency disorders - Life style diseases - Malnutrition, Food adulteration - Different diagnostic techniques - Antibiotics - First Aid - Blood Donation - Immunity - Vaccination - Immune disorders - Different systems of treatment - Cancer - Drugs and Alcohol Abuse.

**11. Reproduction in Plants**

Life span - Asexual reproduction - examples - Sexual Reproduction - stages.

**12. Reproduction in Angiosperms**

Flower parts - Micro sporogenesis - Megasporogenesis - Pollination - Fertilization - Fruit development - Seed development - Parthenocarpy and Apomixis.

**13. Transport in plants**

Physical phenomenon like Osmosis, Diffusion, Imbibition - Ascent of sap- Different theories - Transpiration and Guttation.

**14. Mineral Nutrition**

Mineral and Non mineral nutrients - Essential and Non essential nutrients - Source and functions of essential nutrients - Deficiency symptoms - Hydroponics and Aeroponics - N<sub>2</sub> metabolism in plants - Biological N<sub>2</sub> Fixation.

**15. Photosynthesis**

Chloroplasts and chlorophyll - structure and function - Light phase Reaction - Dark phase Reaction - C<sub>3</sub> and C<sub>4</sub> plants.

**16. Respiration in Plants**

aerobic, anaerobic - Glycolysis, Krebs cycle, Electron transport system - Respiration as an amphibolic pathway.

**17. Growth and Development**

Plant hormones - Various types of plant movements - Vernalisation and Photoperiodism.

**18. Inheritance and variations**

Mendelian laws - Monohybrid cross - Dihybrid Cross - Test cross - Co-dominance - Multiple allelism - Genetic disorders.

**19. Molecular basis of Inheritance**

Structure of DNA - DNA replication - Transcription - Translation - Genetic code - Mutation - Sex determination in humans - Human genome project - DNA finger printing.

**20. Strategies in enhancement of food production**

Animal husbandry - Poultry, Pisciculture, Sericulture - Animal breeding - Plant breeding - Tissue culture - Breeding for disease resistance, pest resistance.

**21. Bio technology - Principles, applications**

Genetic engineering - DNA technology - steps and procedure - Vectors- types and examples - Bio reactors - types and uses - Down streaming - Applications in Agriculture - Applications in pest resistance - Applications in insulin formation - Gene therapy - Genetically modified organisms (GMOs) - Transgenic plants and Animals.

**23. Microbes in Human welfare**

Growth of micro organisms - Microbes in sewage treatment - Microbes as bio-control agents - Microbes as bio-fertilisers.

**24. Organisms, population and Eco system**

Species, population, community concepts - Abiotic factors- soil, water, light and temperature - Biotic factors - producer, consumer and decomposers - Food chain, food web, ecological pyramids - Ecological interactions - Bio geo chemical cycles - Ecological successions.

**25. Environmental Issues**

Pollution - Water, air, soil, sound and radio active - Causes, effects and control measures - Green house effect - Global warming- causes, effect and control.

**26. Evolution**

Origin of life Theories of evolution - Evidences of evolution - Geological time scale - Mechanism of evolution - Origin and evolution of man

**27. Bio Diversity and conservation**

Bio Diversity - Conservation of Bio Diversity.

**PEDAGOGY****1. UNESCO - 4 pillars of education**

a. Learning to learn, b. Learning to do, c. Learning to live together, d. Learning to be.

**2. Broad national goals of teaching biological sciences**

Broad national goals - objectives of science teaching as envisaged in NCF - 2005.

**3. Mc Cormick and Yager-Taxonomy of teaching science**

- a. Knowledge domain, b. Process domain, c. Creativity domain, d. Attitudinal domain, e. Application domain.

**4. Nature of science**

Science as a process and product - Process skills in science.

**5. Science curriculum**

Concentric curriculum - Spiral curriculum - Principles of curriculum construction - Difference between curriculum and syllabus.

**6. Planning for instruction**

Classroom implications of constructivism and critical pedagogy - Meaning of pedagogic analysis - Importance of pedagogic analysis - Year planning, unit planning, lesson planning.

**7. Methods of Teaching Natural science**

Lecture method - Lecture cum Demonstration - Project method - Experimental method - Heuristic method - Dalton plan - Biography method - Inductive method - Deductive method.

**8. Audio-Visual aids and other support materials**

Importance of using teaching -learning aids - Multisensory approach - Science lab and importance of practical work - Science library - Science fair - Field trips - Science textbook - Teachers handbook - VICTERS - IT@school project.

**9. Evaluation**

Construction of achievement test - Continuous and comprehensive evaluation (CCE, CE & TE) - Grading.

**10. Agencies for quality assurance**

NCTE - NCERT - SCERT - Programmes for the professional development of teachers.

**K. MATHEMATICS****80 Questions**

The examination will be broadly based on the topics prescribed for classes 8 - 10 in Kerala state syllabus for Mathematics but some problems may have links to extension of these concepts to the graduate level. The details are given below:

**1. Content****50 Questions****Arithmetic**

Real number system; modulus of numbers - distance between two numbers, rational numbers, irrational numbers, infinite decimal representation.

Sequences and series : Problems relating to arithmetic progression and geometric progression.

**Algebra**

Solutions of two equations in two variables; Quadratic equations, basic operations in polynomials, factor theorem, remainder theorem, binomial theorem for positive integral index.

**Trigonometry**

Similar triangles, trigonometric measures, problems on heights and distances, geometric problems using trigonometry, properties and solutions of triangles using sine and cosine laws, radian and degree measures.

**Geometry**

Circles : Central angle theorem, angles in the same segment, cyclic quadrilaterals, tangents, angle between tangent and chord. Perimeter and area of circles, length of arcs and area of sectors.

Solids : Volume and surface area of prisms, pyramids, cylinder, cone and sphere.

Co-ordinate Geometry : Co-ordinates, distance formula, slope and equation of a line, slope of parallel and perpendicular lines, perpendicular distance from a point to a line, external and internal division of line segment, equation of a circle with given radius and centre.

Conic sections : Basic concepts and related problems.

Graphs of elementary function such as polynomials, absolute values, trigonometric functions.

**Statistics and probability**

Frequency distribution, classification and tabulation of data, graphical representation of data and frequency distributions, measures of central tendency and dispersion. Basic concepts and problems on probability. Idea of conditional probability.

**2. Pedagogy**

30 Questions

**Nature and scope of Mathematics**

Meaning, language, characteristics, significance, practical utility, curricular considerations and psychological considerations.

**Trends and Developments in Mathematics**

Historical development of Mathematics, latest developments in Mathematics, eminent Mathematicians and their contributions

**Place of Mathematics in Secondary School Curriculum**

Aims and objectives of learning Mathematics at secondary school level, correlation of Mathematics with life, with other subjects and correlation among various branches of Mathematics. Values of teaching Mathematics. Planning of teaching at different stages.

**Approach to Mathematics learning**

Importance of constructivist learning; Concept of learning to learn; concretisation of abstract ideas using learning aids, activities and illustrations; Techniques of individualizing instruction in Mathematics.

**Theoretical bases of teaching Mathematics**

Learning theories of Piaget, Burner and Gagne and the implications of these theories in the teaching of Mathematics, Learner centeredness.

**Modern strategies and Methods of teaching Mathematics**

Models of teaching, process oriented strategies - projects, seminars, field trips, debates etc. Methods of teaching - Inductive method, deductive method, analytic method, synthetic method, laboratory method, project method, problem solving method, heuristic method.

**Teaching - Learning materials in Mathematics**

Textbooks, handbooks, workbooks, qualities of good mathematics textbook and learning aids.

**Curricular Activities in Mathematics learning**

Mathematics club, laboratory, library, organization of Mathematics fair;

**Evaluation of student performance**

Continuous and comprehensive evaluation, grading the performance, achievement test, diagnostic test, diagnosis and remediation, qualities of a good achievement test, types of test items.

## **L. SOCIAL SCIENCE (HISTORY, GEOGRAPHY, ECONOMICS, POLITICAL SCIENCE, PEDAGOGY)**

**80 Questions**

**(i) HISTORY**

**(15 Questions)**

**1. Kerala History**

- Pre - history, Megalithic monuments, Sangam age, Tinais, Kulasekharas
- Advent of Europeans, Mysorean Invasion, Rise of British power, Resistance against the British - Pazhassi Raja, Veluthampi, Paliyathachan, Kurichya Revolt, Agrarian struggles in Malabar
- Social reform movements and leaders
- National movement in Kerala, Aikya Kerala Movement and the formation of the state
- Progress in Education and Health

**2. Indian History**

- Pre - historic period, Harappan culture, Vedic Age, Rise of new religions, Janapadas, Mauryan Empire, Age of Guptas and Vardhanas, Feudalism
- Delhi Sulthanate - Social, Political, Economic and Cultural life
- Mughal Empire - Social, Political, Economic and Cultural Life
- Rise of British Rule, Economic impact, Land Revenue Policy
- Resistance against the British, Revolt of 1857
- Emergence of Nationalism, Indian National Congress, Different phases of India's national movement, Indian Independence
- Integration of princely states, Linguistic reorganization, Foreign policy, Economic planning, Progress in Education, Science and Technology

**3. World History**

- Pre - history, Ancient Civilizations - Egypt, Mesopotomia, China, Greece, Rome
- Religions - Judaism, Christianity, Islam, Confucianism, Taoism, Zorastranism
- Feudalism
- Renaissance, Geographical discoveries, Reformation
- Glorious revolution, American War of Independence, French Revolution, Napoleon, Industrial and Agrarian Revolutions, Capitalism and Socialism
- Imperialism, First World War, Russian Revolution, Fascism and Nazism, Second World War, Chinese Revolution, Cold War, Liberation of Vietnam and South Africa, Disintegration of Soviet Union

**(ii) GEOGRAPHY****(15 Questions)****I Atmosphere**

Structure and composition - Atmospheric temperature and its distribution - Global Pressure belts and planetary winds - Temperature zones and seasons - Forms of condensation and precipitation - Atmospheric pollution and ozone depletion - Global warming and climatic change - Changes in the atmosphere due to the intervention of man

**II Lithosphere**

Interior of the earth - Plate movements, earthquakes, volcanoes - Weathering and its types - Mountains, plateaus, plains - Major landforms by running water, wind, wave and glacier - Changes in the lithosphere due to the intervention of man

**III Hydrosphere**

Distribution of water on the earth - Movements of ocean water – waves, tides, currents - Underground water, rain water harvesting - Changes in the hydrosphere due to the intervention of man

**IV Modern Techniques in Geography**

Remote sensing - Geographic information system

**V Continents of the world**

- Physiography, climate, vegetation, soil, minerals, agriculture & industries

**VI India**

- Physical aspects – Location, physiography, climate, drainage, soil and vegetation
- Economic aspects – Major crops, agriculture, industries and transport
- Human aspects – ♦ Population – distribution, density, growth and sex-ratio  
♦ Migration and settlements

**VII Map and Map study**

Map scale, direction - Conventional signs and symbols - Latitude, longitude, longitude and time - Types of maps, Topographical maps

**(iii) ECONOMICS****(10 Questions)****I. Economic Growth & Development**

Characteristics of Growth and Development - Human development Index and its components - Sustainable Development - India

**2. Sectors of the Economy - Issues and Challenges - India and Kerala**

Primary, Secondary and Tertiary Sectors - Sectors and its contribution to National Income - Role of public, private and joint sectors in development - Food Security - India and Kerala

**3. Economic Systems and State Finance**

Capitalism, Socialism and Mixed economy - Classification of Government revenue and expenditure - Budget - concepts, types, expenditure classification in budgets - India and Kerala

**4. Money and Financial system**

India's Financial System - Banking and Non-banking Financial Institutions in India - Nationalisation of Banks in India - Development banks - RBI & Monetary regulations

**5. Globalisation**

Globalisation, Liberalisation and Privatisation - Multi National Corporations - Foreign capital - Types and Features - International Economic Institutions - IMF, IBRD, G ATT, WTO, ADB

**(iv) POLITICAL SCIENCE****(10 Questions)****1. Democracy**

Direct and Indirect - Direct Democratic Devices - Democracy in India: Recent Trends and Challenges

**2. India: Constitution, Government and Politics****(A) Constitution of India**

- Constituent Assembly - Preamble, Fundamental Rights, Fundamental Duties, Directive Principles of State Policy, Federal and Unitary features - Division of Powers - Amendment Procedure

**(B) Government: Union and State**

- *Legislature*: Parliament and State Legislatures
- *Executive*: President, Vice President, Governor, Prime Minister, Chief Minister and Council of Ministers
- *Judiciary*: Supreme Court, High Court, Subordinate Courts, Judicial Activism, Public Interest Litigation

**3. Local Self Governments**

Panchayati Raj and Nagara Palika systems

**4. Politics in India**

Political Parties and Party System - National and State Parties - Election Commission of India - State Election Commission

**5. Human Rights**

Universal Declaration of Human Rights (UDHR) - National Human Rights Commission (NHRC) - State Human Rights Commission

**6. International Organizations****(A) United Nations Organisation**

- Organisation, Organs and Objectives - Specialized Agencies - WTO, WHO, UNESCO, IMF & World Bank - UN's Environmental Summits and Conferences

**(B) Regional Associations**

- NAM, SAARC, ASEAN

**(v) Pedagogy****(30 Questions)**

Meaning, Nature, Scope, Importance and Correlation - National goals, Aims, Objectives and Values of instruction - Taxonomy of instructional objectives and specific outcomes of learning - Pedagogical analysis - objectives, advantages and dimensions - Planning of instruction - Importance, stages and principles - Methods, approaches and principles of instruction-traditional Vs modern - Instructional strategies - Criticism for selection, characteristics and principles - Characteristics, elements and families of models of teaching - Curriculum - modern trends, principles and organizational approaches - Learning resources and co-curricular activities in learning - Learner needs and types of learning - Basic requirements of learning - process skills, prerequisites and student skills -

Evaluation - Purpose, modern trends and principles - Types of tests/questions - merits and demerits

Social science Teacher - qualities, qualifications and professionalism
