4. Read the following passage and answer the questions that follow : $1 \times 4 = 4$

In 1929 he published a law relating their rate of recession to their distance from us, and concluded that the universe is expanding. If that is true, then the

universe must have been smaller in the past. In fact, if we extrapolate to the distant past, all the matter and energy in the universe would have been concentrated in a very tiny region of unimaginable density and temperature, and if we go back far enough, there would be a time when it all began—the event we now call the big bang.

Questions :

- (a) Who published a law relating to the recession of the galaxies ?
 - (b) What did Hubble conclude ?
 - (c) What does this passage say about the universe ?
 - (d) What is the name given to the origin of the universe ?
